### **Press release**

The new edding 4085 chalk marker by Securit offers incredible creative potential on chalkboards, window panes and glass. Marker specialist edding designed the new, slimline chalk marker in collaboration with Securit, known for its variety of creative and lifestyle products centring on chalkboards and signs for private end users and professional applications.

The new edding 4085 chalk marker by Securit offers endless creative possibilities in 20 vibrant colours, including pastel and metallic shades. Equipped with an especially fine tip (1–2 mm), it perfectly rounds off edding's existing chalk marker range which already features a thicker bullet tip and an extra-wide chisel tip. The opaque colours look particularly dazzling on dark chalkboards such as those offered by Securit. Filled with liquid chalk, the odourless chalk markers are not only suitable for painting, drawing and writing on chalkboards, but can also be used to express creativity on glass, mirrors and windows, as well as any other smooth surface. The creation can be effortlessly wiped away without a trace and replaced with a new painting.
